

Innovations in Bitumen Emulsions – an Industry Update

The Society for Asphalt Technology is proud to present to the industry at large, a seminar on current and future bitumen emulsion technology in South Africa. Presentations and discussions will include.....

1. Bituminous emulsions in RSA – what have we got now, and what products could be under development to cope with challenges in the years ahead;
2. Compatibility, suitability and appropriateness of current and future bitumen emulsion products;
3. Emulsification of pre-modified binders, quick bond strength to cope with high trafficked areas, some new perspectives and the way forward;
4. Preventing run-off at steep grades,
5. Thin quality surfacing *throughout the year*,
6. Stability, flexibility, durability and self healing, and much more....

Please note the following dates and regions at which this seminar will take place, and **put them in your diaries....**

29 May 2018 – Cape Town
30 May 2018 – Port Elizabeth
31 May 2018 – Durban
01 June 2018- Pretoria

We are extremely fortunate to have the following prominent and highly specialised presenters who will deliver the following:

Kobus Louw : *“Emulsification of pre-modified binders”*
Alan Wills : *“Increasing the scope for bituminous emulsions”*
Johan Muller : *“Providing new solutions for old industry challenges”*
Gerrie Van Zyl : *“Bitumen emulsions – what we have and what we don’t have”*

Delegates will register at 12 noon, the proceedings will start at 12h30, there will be a 15 minute tea break at 3pm and the seminar will finish at around 5pm, followed by refreshments.

Invitations will be sent to you by your regional Chairpersons in due course.

SAT encourages you to pass this save-the-date reminder onto any other interested colleagues within your organisation who will undoubtedly gain valuable knowledge and insight from this quality workshop.
